

PARIS REGION'S QUANTUM ECOSYSTEM

Paris Region's ecosystem players

- Existing
- In progress

Type of players

- Start-up
 - Venture Capital funds
 - Major equipment
 - Network animation
 - Public research / Private research
 - Key technologies providers
 - Early users
- Facilitators

Disciplines

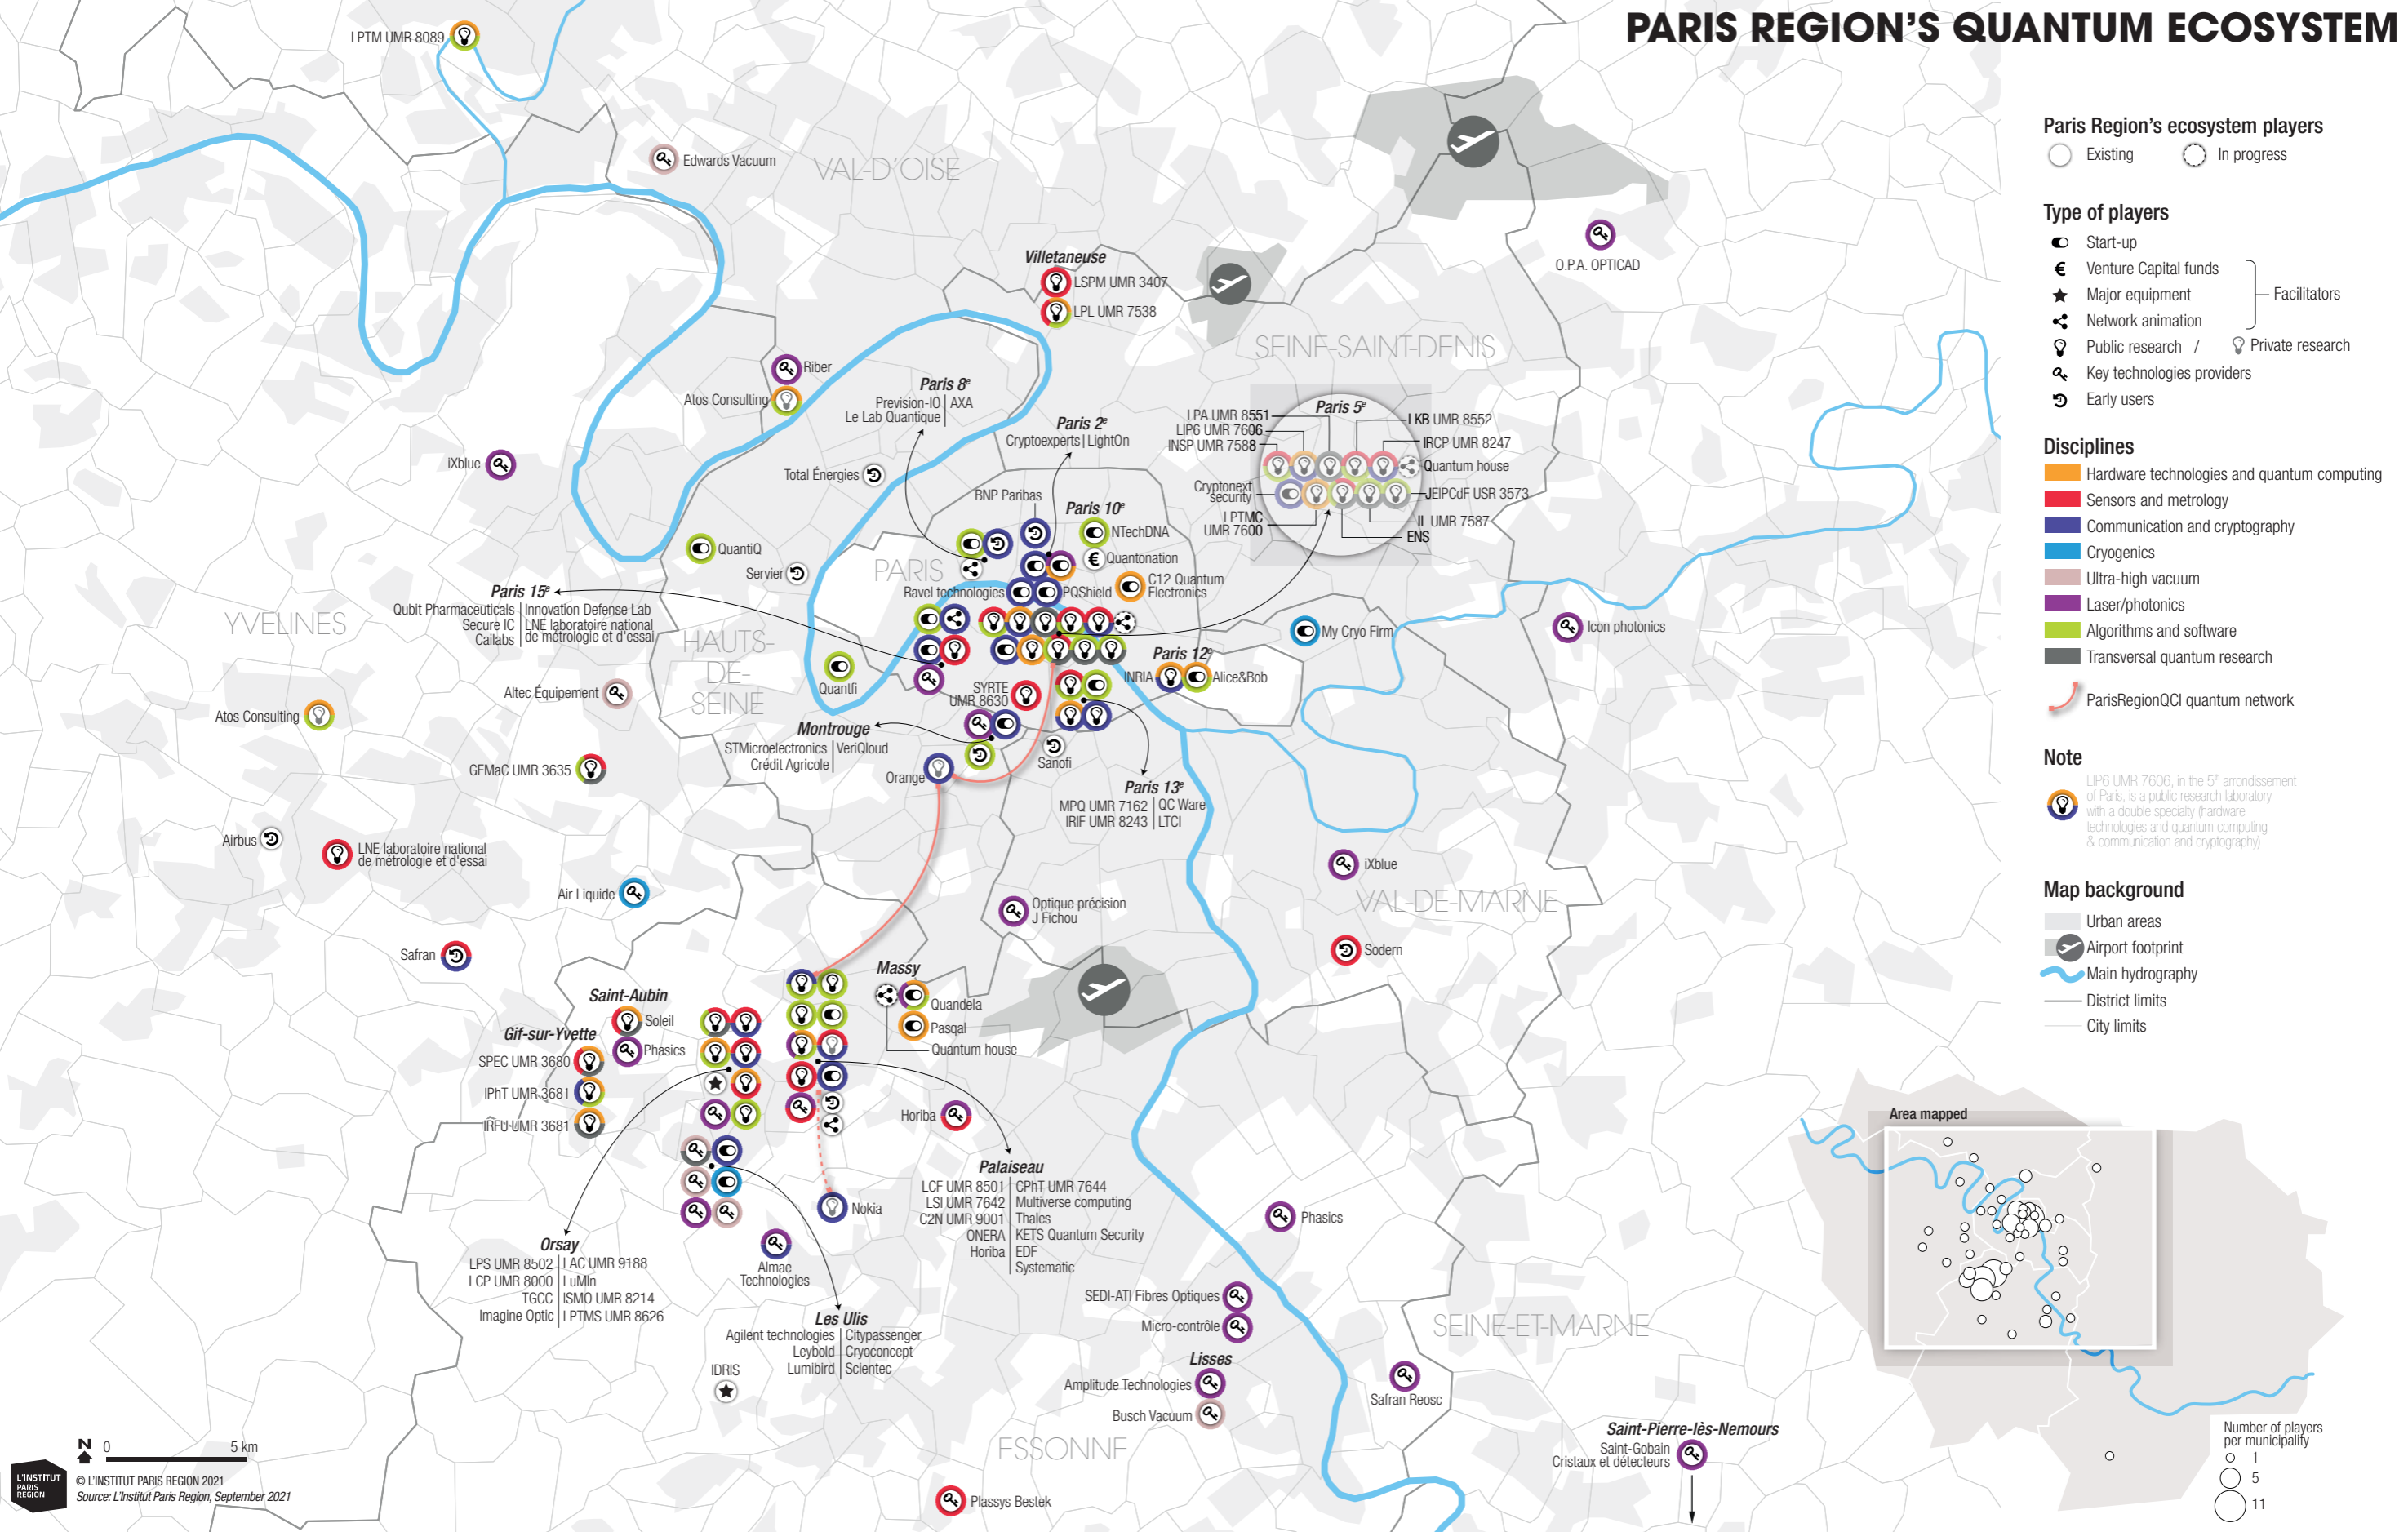

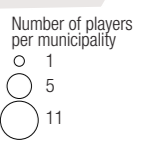

- Hardware technologies and quantum computing
 - Sensors and metrology
 - Communication and cryptography
 - Cryogenics
 - Ultra-high vacuum
 - Laser/photronics
 - Algorithms and software
 - Transversal quantum research
- ParisRegionQCI quantum network

Note

- LIP6 UMR 7606, in the 5^e arrondissement of Paris, is a public research laboratory with a double specialty (hardware technologies and quantum computing & communication and cryptography)

Map background

- Urban areas
- Airport footprint
- Main hydrography
- District limits
- City limits

0 5 km
